Présentation de l'éditeur

The Swiss astrophysicist and rocket scientist Fritz Zwicky (1898-1974) is one of the most prolific sources of pioneering ideas in astronomy in the 20th century. He became Professor at the California Institute of Technology (Caltech), Pasadena, where he did excellent work as researcher, discoverer, inventor and morphologist. Astronomers regard him as the father of «dark matter», which he predicted as early as 1933. With simple sky-watching equipment Zwicky discovered 123 supernovae. He was successful in the field of galaxy research and also acquired a great reputation as a rocket scientist. Under his leadership the Americans succeeded in launching the first object into space in 1957. Zwicky's personality was unconventional and occasionally he sparked controversy. When offered American citizenship, he refused, remaining true to his Swiss roots, to Glarus and to the mountains he loved to climb. His ideas were generally brilliant and always unconventional. He also invented the Morphological Box creativity method. His story is surprising, exciting and rich in anecdotes. Biographie de l'auteur

Alfred Stöckli, Dr. Sc. ETH Zurich. 1969-1971 Assistant at the Swiss Federal Institute of Technology in Zurich. Doctoral thesis on «General Organization Methodology.» From 1973 he worked in industry (as CEO, Partner, Chairman). President of the Fritz Zwicky Foundation, Glarus.
